

# AcadsVue

## Digital Assessment Simplified

AcadsVue is a **Digital Evaluation** platform that enables teachers to maintain consistency in grading and allows schools to make data driven decisions about student learning. This innovative tool can unveil insights into children's potential by helping to analyze students' performance throughout their schooling journey. By offering continuous feedback, it greatly influences education and development of each child.

**Upgrade your Evaluation Process NOW!**

## WHY STELLARIS?

With more than two decades of expertise in Document Capture and a range of software products and modules designed for high accuracy, Stellaris Technologies introduces AI-powered solutions that harness the power of Artificial Intelligence to empower teachers to assess the extent of student's understanding

Without disrupting current methods of conducting exams, AcadsVue allows handwritten answer sheets to be evaluated, gathering metrics about the student's understanding of the lessons. This empowers schools to establish a vision that enables management, teachers, and staff to concentrate on achieving the best possible outcomes for students.

# AcadsVue

**Faster grading. Fairer evaluation. Consistent results.**

Exams and assignments offer a **structured** method for assessing students' understanding, guaranteeing that all learners are evaluated against the same criteria. However, grading answer sheets can be a laborious and time-consuming task. To maintain **fairness** and **objectivity**, Educators must evaluate responses to subjective questions without bias. AcadsVue allows for every student to be assessed using the same scoring standards. It **streamlines grading** for both objective and subjective questions, **improves consistency** among evaluators, and **significantly reduces** the time required to publish accurate results.

AcadsVue allows Parents, Teachers and Management to track and monitor the child's progress through all their learning years and help them learn better.
