Company Profile

Stellaris Technologies provides **Document Capture solutions** across all domains for customers ranging from large multi-national enterprises to system integrators to industries. Our customers include Banks, Insurance companies, Hospitals, Tax Processing companies, Manufacturers, Departments of Revenue and Business Process Outsourcing companies in USA, Canada, Brazil, Europe, South Korea, Hong Kong, Malaysia, Australia and New Zealand.

Established in July 2005, we serve as an **OpenText Technology Gold Partner** creating solution extensions for Intelligent Capture. We are also an offshore development partner providing Professional Services in **OpenText Intelligent Capture**. With our vast experience in OpenText's Capture suite of products, we are extremely proficient in automated Classification and Recognition techniques and have extensive experience working with customers around the world. When developing a capture solution, we strive to maximize accuracy while delivering best system performance.

Leveraging this experience in the document capture domain, Stellaris Technologies has developed **STDocCapture** - an end-to-end document capture product. It can be configured to automate capture of data and help customers initiate the **digital transformation** of their operations.

Coupled with this is **STSafelInfoVault** – a **document storage and retrieval** product that allows storage of documents along with metadata. It supports document versioning and controlled access.

Our Expertise

Stellaris Technologies has worked extensively in the Document Capture domain and we understand the challenges that it presents. Our core strengths lie in delivering maximum performance and value from Capture solutions. The goal is **maximum accuracy and throughput** for Automatic Classification and Data Extraction, thereby **reducing errors** and **minimizing data entry costs**.

Our software expertise includes:

- **Designing solutions** on Intelligent Capture (formerly Captiva)
- Upgrades/ migrations from older versions to Intelligent Capture
- Configuring **Invoice Capture** with single template
- Development of **REST services**
- Development of custom modules, scripts in C#
- Image cleanup using **dynamic thresholding to improve OCR**
- **Automatic Capture of table data** from a variety of formats

Customer Speak

"Stellaris has been an exceptional partner on a critical product launch for us. Their team's work ethic and dedication have been admirable, and they have worked wonderfully side-by-side with our team members to ensure the product's success."

- Director, Product Management [Customer]

"Fabulous technical knowledge, sheer will & motivation to deliver solid results. Fun to work with and Stellaris takes the time to provide context around the work they are doing. I would easily work with Stellaris again."

- Product Manager [Customer]

"[Stellaris' consultant] was very professional & proactive in his approach to delivering the agreed scope of work. He exceeded our expectations with his ability to deliver within the agreed time frame. Our client was very impressed with both his skills and his work ethic. Thank you... for your dedication & commitment."

- Project Manager [EMC]

"[Stellaris Consultant] is a very valuable asset for Stellaris. His dedication of work, positive attitude and patience are well appreciated by both technical team and business users. We are thankful having him onsite, and looking forward to working with him again."

- Project Manager [Customer]

Innovation @ STELLARIS

Complete Capture Solutions

STClaims & STDentalClaims

- End-to-end solutions for processing USA medical claims forms – **CMS1500 & UB04, ADA Dental forms**
- Simple user data entry with multiple Validation modes
- Capture of data from both drop out and non-drop out versions of the claims forms with high accuracy
- Supports ICD10 codes and **ANSI 837-5010 Export**

STTranscripts

- A pre-packaged solution for Educational Institutions to capture information from **academic transcripts** – both high school as well as college transcripts
